T. JOHN COLLEGE
NAAC Accredited with 'A" Grade
Recognised by UGC under sections 2(f) and 12(b) & Affiliated to Bangalore University

Samples of tests conducted

1. Multiple Choice Questions

Unix Programming Lab (Internal Test)

T. JOHN COLLEGE
DEPARTMENT OF COMPUTER APPLICATIONS
(IV Sem. BCA Internal Exam. June 2021)
Unix Programming Lab

Time duration: 1:30 Max Marks : 25

*Required

1. Name *

2. Register Number *

3. 1. Which command is used to display the top of the file? *

Mark only one oval.

- cat
- head
- more
- grep
- None of the above

4. 2. Which command is used to change permission mode of files *

Mark only one oval.

- chmod u+x flename
- chmod 777 filename
- chmod 222 filename
- chmod 777 directory name
- None of the above

5. 3. Which command is used to remove a directory? *

Mark only one oval.

- rd
- rdir
- dldir
- rmdir
- None of the above

6. 4. Which command is used to remove a file? *

Mark only one oval.

- remove
- del
- rm
- rnv
- None of the above

OPERATING SYSTEM.

An Operating system performs all the basic taks like managing files, processes, and memory. Thus operating system acts as the manager of all the resources, i.e resources manager. Thus, the operating system becomes an interface between user and machine.

TYPES.

1. Batch operating system

This type of operating system does not interact with the computer directly. There is an operator which takes similar jobs having the same requirement and group them into batches. It is the responsibility of the operator to sort jobs with similar needs.

2. Time - Sharing operating systems

Each task is given some time to execute so that all the tasks work smoothly. Each user gets the time of CPU as they use a single system. These systems are also known as Multitasking systems. The task can be from a single user

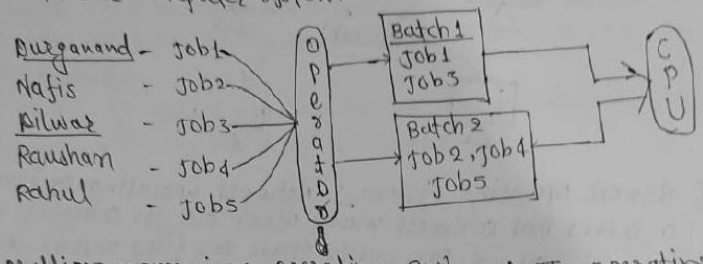
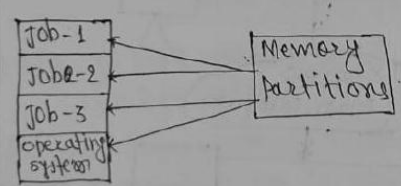
sem - III rd

TYPES

Batch operating system – The Batch operating system will work to summit similar kinds of job together In this operating system, user do not intract directly with our computer system



(2) Multiprogramming operating system :- The operating was a computer operating system designed by a team led by edger w. Dijkstra. describe in monographs in 1965-66 and published in 1968.



(3) Time sharing operating system :- The time sharing operating system works with time sharing concept.

Here the cpu will be provide a same time period to each an every process to complete its tasks as soon as possible weather it is a long process & short process

3. Case studies

Case Studies

Introduction

The call comes in.

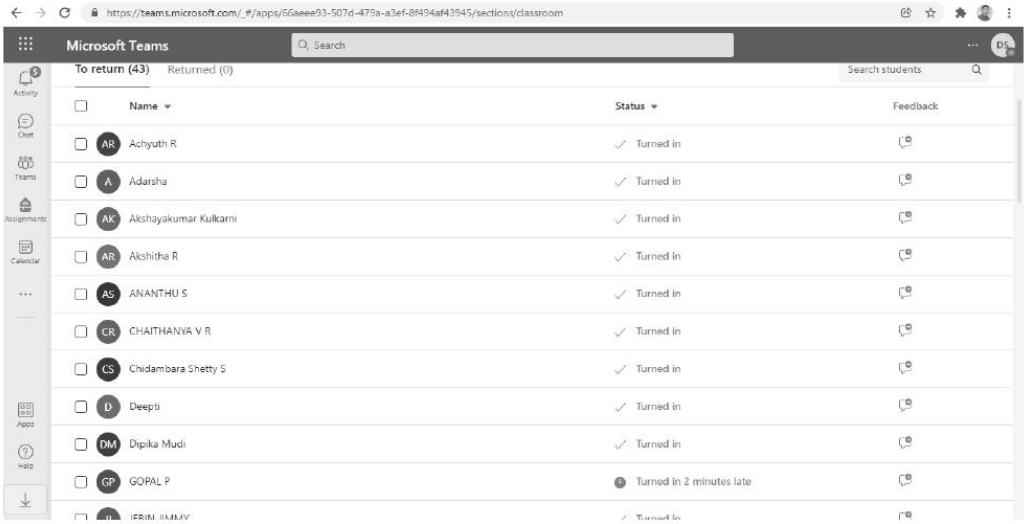
> Someone's being stalked – two employees get into a shoving match – a woman flees a violently abusive mate – a sometimes-disoriented employee keeps showing up at coworkers' homes – a supervisor's constant abuse infuriates a subordinate – an employee in a fit of rage destroys company property – a fired employee makes a direct threat.

These are just a few examples of the types of incidents that can happen in the workplace.

How each employer responds to these reports will differ, not only among different organizations, but sometimes within the same organization, depending upon the circumstances of each situation. Even in organizations with highly structured, well-thought-out procedures in place, the handling will have to depend on:

- The nature of the incident;
- The circumstances surrounding the incident;

4. Online Assignments



5. PowerPoint presentations

   Classroom presentations done by students in the subject

Robots in Hotel Setting

Automation ranks high up on the list of hospitality trends to be aware of and robotics is good example of this being taken further. Hotels, restaurants and similiar businessess can use robots to greet customers and provide customer information, while they can also play a vital role in security operations too. Within the hotel setting, robots have been used to offer room service and perform cleaning and other housekeeping chores. This can be useful to provide information to guest.

7. Rubric

RUBRIC SIX: STUDENTS SEMINAR EVALUATION RUBRIC

Name of the Student Presenter: _____

Teacher/Evaluator:_____

Date_:.....

Overall Grading Scale:

D	C	B	A
15	34-16	35-47	48-60

Evaluate the student's research presentation employing the following range-scored criteria (best is on right)					
	Inadequate	**Average**	**Admirable**	**Outstanding**	
Knowledge and Content	**1**	**2**	**3**	**4**	**Score**
Organization of presentation	Hard to follow; sequence of information jumpy	Most of information presented in sequence	Information presented in logical sequence; easy to follow	Information presented as interesting story in logical, easy to follow sequence	
Background content	Material not clearly related to topic **OR** background dominated seminar	Material sufficient for clear understanding **but** not clearly presented	Material sufficient for clear understanding **AND** effectively presented	Material sufficient for clear understanding **AND** exceptionally presented	
Methods	Methods too brief or insufficient for adequate understanding **OR** too detailed	Sufficient for understanding **but** not clearly presented	Sufficient for understanding **AND** effectively presented	Sufficient for understanding **AND** exceptionally presented	
Results (figures,	Some figures hard to read	Majority of figures clear	Most figures clear	All figures clear	
	Some inappropriate	Majority appropriately	Most appropriately	All appropriately formatted
