Policy for restriction for use of Plastic in the campus

Plastics are creating hazardous environment. The littering of plastics in open spaces creates unhygienic conditions, as it acts as a breeding ground for insects and mosquitoes that cause diseases like malaria and dengue. Plastics are swallowed by fish, seabirds, and other marine species, thus leading to suffocation and death. To create a sustainable environment, there must be reduction in the use of plastic. With this motive, T John College has initiated the following measures to create a plastic-freepreemises.

1) Various programs like seminar, workshops has been conducted for the students and staffs to create awareness about the harmful effects of plastic usage.
2) Students are encouraged to use compostable and biodegradable substances as a replacement to the plastics like paper cups, cloth bags, etc.
3) Posters related to the hazardous effects of plastics are been displayed in the campus.
4) Students are motivated to use environmental friendly alternatives instead of plastics.
5) College has restricted the use of plastic for any of the events.
6) Packing materials used in Canteen and stores are biodegradable.
7) Installation of water purifiers in the campus has been done to avoid the purchase and use of plastic water bottles.

Policy for usage of Electric vehicles

Carbon fuels such as wood, coal, petroleum release unburnt carbon particles into the environment. These particles are very dangerous pollutants and cause respiratory diseases for example asthma.To create a pollution-free environment, T John College has taken the following initiatives,

1) Various seminars have been conducted to create awareness about the benefits of using electric vehicles.
2) College has planned to install an EV charging station in the premises.
3) Students are educated about the various benefits given by the government for encouraging the use of Electric vehicles such as road tax and registration charge exemptions etc.
