Chairman's Message

Greetings and hearty welcome to all the stakeholders of TJohn College!!!

The groundwork for a better life lies in education. It is the most powerful catalyst for social transformation. However, a child cannot be educated in isolation. Only an empowered family, especially the mother would be willing to educate their child. Education empowers an individual to earn their livelihood and also increases one's awareness on a range of issues.

Dr. Thomas P John
Chairman, T John Group of Institutions

The National Education Policy, 2020 unveiled by the Ministry of Human Resource Development ("MHRD"), is revolutionary in every sense. While the Policy focuses on multiple aspects, including the need for early childhood care, inclusive education and revamping of the current curriculum, an inherent thread that runs through the Policy is the interplay of education and technology. Over the last decade, India has transformed itself into an 'information intensive society' and there is a growing requirement to embrace the usage of technology in the field of education. In this regard, the Policy notes that one of the central principles steering the education system will be the '***extensive use of technology in teaching and learning, removing language barriers, increasing access as well as education planning and management***'.

In this issue we consider current trends in technology impacting students and modern educational environments We hope our readership will feel more encouraged by the change that is taking place and challenged to play an active role in these advancements Lastly it is our aim to inspire educational leaders to take initiative in implementing new strategies tools and ideas through technology use in institutions of higher education words wide.

Sr. Rose Mary Balappa
Principal
T. John College

Principal's Message

The importance of technology in aiding teachers, bridging the language barrier between teachers and students, creating digital libraries, popularizing language learning as well as ensuring greater access to education cannot be underestimated. Technology can be an effective tool in facilitating teacher education and encourages the utilization of technology platforms for online teacher-training.

The need to embrace technology in professional education (legal/health) as well as the incorporation of technology to expedite the aim of achieving 100% literacy (by introducing quality technology-based options for adult learning) has also been put forward. The importance of technology in addressing various societal challenges seeking to promote interdisciplinary research and innovation has been on the rise for instance, Higher Education Institutions ("HEIs") have been encouraged to set up start-up incubation centers and technology development centers, and a National Research Foundation is also proposed to be set up to cultivate a culture of research. The establishment of the National Educational Technology Forum ("NETF"), which shall operate as a platform for free exchange of ideas on the use of technology to enhance learning, assessment planning and administration for school and higher education is gaining momentum to meet the next generation requirements. My best wishes to all the faculty members and students for their contribution in this newsletter.

IQAC Director's Message

Prof. Dr. C Karthikeyan
IQAC Director,
T John College

If we fail to control the life events and task, it will rule us and create an imbalance in all chores of our life. The co-curricular activities and club activities along with academic events helps the learners to manage their time, use their abilities, smart and creative way of implementation thus to be efficient and skillful in any arena of their life. I wish you all the best for all your ventures.

The word "technology" and its uses have immensely changed since the 20th century, and with time, it has continued to evolve ever since. We are living in a world driven by technology. The advancement of technology has played an important role in the development of human civilization, along with cultural changes. Technology provides innovative ways of doing work through various smart and innovative means. Electronic appliances, gadgets, faster modes of communication, and transport have added to the comfort factor in our lives. It has helped in improving the productivity of individuals and different business enterprises.

Technology has brought a revolution in many operational fields. It has undoubtedly made a very important contribution to the progress that mankind has made over the years. Technology has reduced the effort and time and increased the efficiency of the production requirements in every field. It has made our lives easy, comfortable, healthy, and enjoyable. It has brought a revolution in transport and communication. The advancement of technology, along with science, has helped us to become self-reliant in all spheres of life.

If the innovation of a particular technology, becomes part of a society it becomes an integral part of human lives after a point in time. The new education policy has already garnered attention nationwide, and in fact worldwide. Every country is now closely monitoring each other on the forefront of innovative education system, to make its human resources more productive and innovative. The most indispensable key element is "Quality consciousness "and inclusiveness", so as to benefit every stakeholder. At this outset, we at T. John College have augmented our networking capabilities with the support of IQAC to elevate from mere participant to a contributor, from every stakeholder of T. John College, be it Teachers, Students, Management, Employers and Parents.

The first step towards the quality consciousness movement was started by the top management, in revamping the IQAC functions. The IQAC now is revamped with new members, and the team is chosen as per the track records of the performance in the Department, and the exposure and experience of the faculty member. The team comprises of various office bearers, with additional responsibilities and the IQAC is now led by a new and energetic team of new generation teachers, to lead the operations, and in enhancing quality inevery operation possible. The members have handled two successful NAAC processes prior to this assignment, and is additionally handling Autonomous Process, alongside with huge support from the principal, as the Chairperson of the IQAC and the College Coordinator who oversees the discipline compliance in the college.

As part of the quality assessment council, we at T John college extend our best support possible to all the stakeholders of our society, and to the building up of the nation as a whole.

Vice-Principal'sMessage

Dr. Lakshmi
Vice-Principal
T. John College

Significance of technology in helping faculties to bridge the communication barrier with students, creating digital libraries, as well as ensuring swift access to education must be recognised.

Technology no doubt is an effective tool in facilitating teacher education and encourages the utilisation of technology-built platforms for online teacher-training. The need to embrace technology in professional education (legal/health) as well as the incorporation of technology to expedite the aim

of achieving 100% literacy (by introducing quality technology-based options for adult learning) has also been put forward.

The importance of technology in addressing various societal challenges and furthermore promote interdisciplinary research and innovation need to be noted. For instance, Higher Education Institutions ("HEIs") have been encouraged to set up start-up incubation centres and technology development centres, and a National Research Foundation is also proposed to be set up to cultivate a culture of research. The creation of the Academic Bank of Credit to digitally store academic credits earned from various HEIs to facilitate the grant of degrees based on credits earned over a period of time, is also a progressive step towards advancement in education and technology.

Faculty Write up: Advancements in Technology

Advancement in Technology: FOREWORD

Mr. Siby Mathew
Department of Hotel Management

In the age of continual change and growth college campuses have the opportunity to expose students to the advancements being made in technology through engagement with new tools, platforms and information websites. Additionally, educators are now required to prepare students for success in fields that will come to rely on technology. Augmented and virtual reality are also being used to support language education and experiential learning.

Moreover, technology is now being used to educate unify and mobilize students fighting for a cause or supporting social justice movements. Additionally, we are now seeing politicians using social media to speak directly to their constituents and voters creating a climate of truth-seeking exposure and relatability.

For the first time ever, educators are in the process of teaching to digital natives which creates fear and anxiety in many veteran teachers. Students are now more exposed to their classmates through technology and the world around them. Students also have access to one another outside of the classroom doors on a 24-hour basis.

To address changes this issue will cover a range of topic centered around technology in college and university levels and online learning. We intend with this issue to take a closer look at how technology is affecting teaching learning and professional development in modern society. Our authors ..... In this issue..... We will also evaluate how educators can use technology to enhance students' problem-solving skills and how digital technologies and specifically mobile devices impact students learning and instructional strategies for teachers. This issue will conclude with ....
